

About

Established in 1985, AV Gauge continues to lead the world in new solutions for conformance, validation and quality control verification. AV Gauge has grown to multiple facilities across Canada, the United States, and Mexico, employing over 300 people to meet our customer's exacting demands in their pursuits for even higher quality. We serve that pursuit with the supply of innovative design, careful construction and certification of check fixtures, gauges, and automation systems. Vertically integrated to ensure quality and timing, we empower our people to explore the latest technologies and improve our processes to satisfy our customers' needs.

Mission

We dedicate ourselves to helping employees, customers, suppliers, and communities grow in knowledge and capabilities to manufacture better products through our validation, conformance, and automation solutions.

Vision

To invest in our people and customers so we are the recognized global leader in validation, conformance, and automation solutions for the manufacturing sector.

Value Proposition

We provide solutions for product conformance and tolerancing in cost-effective, innovative, and on-time ways to help our customers improve their manufacturing process. As a leading industry expert, AV Gauge is the best partner to increase your capabilities and knowledge in this quality arena. Come grow with us.

Core Values

Our Belief:

Treat others as you would want to be treated.

Customer Focused:

Provide the highest quality products, services, and support to every customer.

Teamwork:

Work together to maximize efficiency and innovation while providing the highest quality solutions.

Character:

Be passionate, brave, present, accountable, and disciplined in everything you do.

Learn, Improve & Mentor:

Invest in yourself, and others. Be open-minded, flexible and teachable.
